Greenville P.A Jan 30. 1800.

My dear Brother Osborne:

I send you a statement
about the condition of the
mine. If you are going to
give the mine a metallic sur-
port it will not be necessary
to put the statement on the
door of the case as ~~is~~ talked of
at present. I also inclose the
the little sketch of the two
fields of view in corners.
Please ^{put} it with the Prof. Brown's
statement in your hands, and
my statement inclosed in
this letter in the same com-
pany for future reference
as authority in the case.

By the way what is the
hitch in failing to send

me the papers transfer-
ing the bit of property to
me I can not transfer
it to myself - Will you
please look the thing up
a row bit. Do - -

I trust that you are all
well at 1414.5 Street.

Send love to all the mem-
bers of your pleasant
household - I presume
that "Harold the darter"
is still running his
smokeless engine as in
days of yore -

I am full of health and
quiet breathing - I am in
hot pursuit of a little more
knowledge in a wisdom

This is very wintery weather
and I am keeping in the
house more than usual
as I purchased of late the
30 vols of the Encyclopaedia
Britannica - It is great, it
stands first, and gives
rich pasture to such a
poor per capita as the
stall as I have been!

God bless you all amen
Yours truly

John Peate

Weather has been poor
in this region so far
this winter, and am in
hope and I am hoping for
some ~~more~~^{good} before the close of
winter.
