Tradisin, buseous in THE AMERICAN UNIVERSITY, OFFICE, 1425 NEW YORK AVENUE, WASHINGTON, D. C. Oct. 6" 94. Tresses Olins Red, Hustril & Eller : Deer Sirs: frums of Seph.

28" has first frumed me at this place.

Allow me to say in reply, in the first Julace, that my letter was only intended to be suggestive in the way of information, and that I had no intention of any nothing more. I do not claim to have ang æneh knowledge of landsæge work, or skill in it; at wish to interfere with
your prishing us the best scheme for me that your well-known ability can produce. As to the circle of threes on Bishops Will, y, and planted, at the suggestion of, some friends in Washington, before I became connected with the enterprise - I will consult By Hurst I may the able to weach him before that I fear some frænds will be much disappointed if a change is male miles and

While There has been no definite action as to the method of healing, it is understood that it is the expectation and plan to heat all buildings from a (central, or rather) verminon hower House, and to light by electricity from the same of see the danger i you refer to in connection with it, and would be glad of Anggestions æst & anything more feasible -If any other location of the Power House and set upon any special section. Would it not be difficult to force heat against the wind if it men put in abother direction? South corner, meanthing the stack overs, say, at the South corner, meanthing Frightond Pour ? And would not all distance the on objecting? Me shall want the most thorough ventilating system, and Think your suggestion a good one, if it is not too expensive for me = too expensive in its con-Timued operation. Une do not fear first cost so much as me de operating cost-I have Just been through the lorscousin State University, and expecially its new gymnasium, first being completed and firmished at a cost of \$150,000. I appreciate fully what you say about the scientific of I were planning physical training of structure. If I were planning for a College, I would make it a requirement

ster as vigorously suforced as the study of butter smetics, that would feel that such a departs But it seems to me that would of that, belongs to the College, and not to Nostgraduate sout sufference Departments. There will be most positive weekt facilities for exercise. Hu question in my mint is cheifly as to foot-ball and base-ball - Not at all one of apposition & these, but of South whether the class of a Bostgraduate students will grounds of that this will arrange in granosty think a May pudgment is that they will, any age in granosty exercises indvors, in tennis, bowling, assuring and willings But as I said in beginning, I only wrote in the spirit of giving information from our suil of the line

and would Imfor that you use your own fredom and findgment in all These matters. Only I would like to have located somewhere the list of buildings sent your on the sketch pencelled on lisson paper -I hope you will ful perfectly free to suggest any changes whatever, and to ask for any informalion 4 may be able togive you- What we want is simply the best sesults - I will write you as soon as 4 su Bj.
